www.BeamingWhite.com
Beaming White® is one of the most fully integrated manufacturers of teeth whitening products and accessories. From the actual gels to the packaging to certificates of analysis and export certificates, Beaming White can do it all for you. Whether you want gel in bulk or completely finished product shrink-wrapped ready to go on the shelf, odds are that we can offer you a more competitive overall service than anyone else. All gels and liquids that comprise the products are made and filled in our manufacturing facility in Vancouver, WA, USA.

Besides manufacturing your products, we offer some of these optional services:

**Custom Formulations**
If you don’t want to go with our standard formulations, we’ll gladly customize them for you. If you are looking for particular features or specifications, we can prepare a formulation, or we can manufacture your gel with any formulation you provide.

**Strategic Advice**
Teeth whitening is the only thing we do, and we’ve been doing it since 2007. We have customers in most countries around the world for our branded product as well as for private label, so we know what works in what regions, and we have experience dealing with regulatory affairs in general and in many countries in particular. With offices in London, Barcelona and Shenzhen, we have you covered everywhere.

Besides knowing what’s allowed and what’s required in most countries, we know of cultural preferences in different markets, from actual products to presentation to packaging. We probably have experience in almost everything that you are wanting to know about how to have a successful teeth whitening product line.

**Graphic Design**
We have designed so many different kinds of packaging and marketing materials that we are one of the best options you’ll find to support you in this very important function. From logos to boxes to labels to displays to brochures and flyers, we have the in-house capabilities and experience. Just let us know what you need.
